

New Career Opportunity

Are you passionate about mobile application development and creating outstanding user experiences? If you are proactive, enjoy working as part of a team, and are eager to continuously expand your knowledge, we invite you to join us.

We are looking for a new colleague to join us in the position of
IOS DEVELOPER SPECIALIST

»We are looking for an iOS Developer who is eager to actively contribute to the development and enhancement of mobile applications. We value a proactive mindset, a willingness to learn, and a passion for exploring new solutions. It is important to us that you enjoy working collaboratively, sharing your knowledge, and contributing to the development of high-quality digital products through constructive ideas and continuous improvement.«

Your responsibilities will include:

- developing software components based on specifications by writing and implementing efficient code
- providing ongoing support for existing solutions
- preparing technical documentation
- performing unit and integration testing of developed software components
- managing the software development lifecycle using the provided tools
- assessing IT development requests
- collaborating with stakeholders throughout the development process

- ensuring that software solutions meet all required specifications and quality standards
- analyzing issues, identifying corrective actions, and recommending and implementing improvements
- designing complex software solutions
- contributing to software requirements definition and validating solution concepts and designs
- coordinating the integration and optimization of software solutions
- leading and coordinating smaller projects and working groups
- performing other tasks and responsibilities as assigned by the manager

Requirements for the position:

- proof of completed Level 7, Level 6/2, or Level 6/1 education
- statement of no criminal record
- confirmation that you are not subject to criminal proceedings

Expected knowledge, experience, and competencies:

- proficiency in the Swift programming language and SwiftUI framework for user interface development
- understanding of the MVC architectural pattern and application design principles, including separation of concerns
- experience using Git for version control and collaborative development
- understanding of CI/CD processes and experience with tools such as Jenkins
- experience using Figma to review design concepts and translate designs into user interfaces
- understanding of software development best practices, including writing clean, maintainable code, debugging, and testing
- excellent written and verbal communication skills in English, including the ability to work with technical documentation
- willingness to learn and a committed approach to work
- self-motivation and a proactive mindset

Nice to have:

- previous experience in mobile application development, knowledge of development tools and programming languages, and experience working in an agile environment
- active participation in development planning, code reviews, and continuous process improvement
- knowledge of the App Store release process, including provisioning profiles, code signing, and TestFlight
- experience writing Unit and UI tests using XCTest
- knowledge of Firebase (Analytics, Push Notifications)
- familiarity with reactive programming frameworks such as Combine or RxSwift

What we offer:

- hybrid work opportunities
- the possibility to work from Maribor or Ljubljana
- work with modern technologies in an environment that encourages learning and professional growth
- emphasis on code quality, good development practices, and long-term maintainable solutions
- the opportunity to help shape technical solutions and improve development processes

We are looking to hire a new colleague on a **permanent employment contract**, subject to the successful completion of a **6-month probation period**.

Location: Maribor or Ljubljana, with the possibility of hybrid work (combination of office and remote work).

We are here for your career.
