

Are you passionate about mobile application development and creating outstanding user experiences? If you are proactive, enjoy working in a team, and are eager to continuously expand your knowledge and skills, we invite you to join us.

We are looking for a new colleague to join our team as an

ANDROID DEVELOPER SPECIALIST (ANDROID DEVELOPER)

"We are looking for an Android Developer who is eager to help shape modern mobile applications and contribute to their development and continuous improvement. We are not necessarily looking for a specific level of seniority, but rather for someone with a strong desire to learn, explore new approaches, and take initiative. We value proactivity, openness to constructive feedback, and a willingness to share knowledge with the team. If you are passionate about creating high-quality digital solutions and identifying opportunities for improvement, we would be delighted to welcome you to our team."

Your responsibilities will include:

- developing software components based on specifications by writing and implementing efficient, high-quality code
- providing ongoing support and maintenance for existing solutions
- preparing and maintaining technical documentation
- performing unit testing and integration testing of developed software components
- managing the software development lifecycle using established tools and processes
- evaluating and estimating IT development requirements
- collaborating with stakeholders throughout the development process

- ensuring that software solutions meet all required functional and technical specifications
- analyzing issues, identifying corrective actions, and proposing and implementing improvements
- designing complex software solutions
- contributing to the definition of software requirements and the validation of solution concepts and designs
- coordinating the integration and optimization of software solutions
- leading and coordinating smaller projects and working groups
- performing other tasks and responsibilities as assigned by the manager or team lead

Requirements for the position:

- proof of completed Level 7, Level 6/2, or Level 6/1 education
- certificate of no criminal record
- certificate confirming that you are not currently subject to criminal proceedings

Expected knowledge, experience, and competencies include:

- knowledge of the Kotlin programming language and the Jetpack Compose framework for user interface development
- understanding of the MVI architectural pattern and the principles of application structuring and separation of concerns
- experience using Git for version control and collaborative software development
- knowledge of continuous integration and continuous delivery (CI/CD) processes and experience working with Jenkins
- understanding of core software development principles, including writing clean and maintainable code, debugging, and testing
- excellent English language skills, both written and spoken, for effective communication and working with technical documentation

Additional qualifications (nice to have):

- experience working in an agile development environment
- experience using Figma to review design mockups and translate designs into user interfaces
- active participation in development planning, team reviews, and the continuous improvement of ways of working
- knowledge of the application publishing process on Google Play
- experience writing unit tests using JUnit
- knowledge of Firebase services, including Analytics and Push Notifications

What do we offer?

- possibility of hybrid work
- possibility to work from either Maribor or Ljubljana
- opportunity to work with modern technologies in an environment that encourages learning and professional growth
- strong focus on code quality, development best practices, and long-term maintainable solutions

- opportunity to contribute to the design of technical solutions and the continuous improvement of development processes

We are looking to hire a new team member on a **permanent contract**, subject to the successful completion of a **6-month probationary period.**

Work location: Maribor or Ljubljana, with the possibility of hybrid work (combination of office and remote work)

We are here for your career.
